Abstract Title: Hydro Hammer

Abstract Theme: Trenchless Project Planning, Design, Construction, and QA/QC

Abstract:

Kamloops Augering & Boring Ltd. (KABL) is leading the way for large diameter pipe ramming and has a patent pending process with an IHC Hydro Hammer. The Hydro Hammer consists of five primary pieces of equipment: rails for the system to travel on, hydraulic press, hammer support cradle, the IHC-S90 hammer and control shack. KABL will do a case study/project review of a completed project(s).
